

QAbstractTableModel

std::vector< commonDefine  
Client::tdLogItemClient >

client::TClientModel

```
graph BT; client::TClientModel --> QAbstractTableModel; client::TClientModel --> std::vector[std::vector< commonDefine Client::tdLogItemClient >];
```

The diagram illustrates the relationship between three classes. At the bottom is a grey-shaded box labeled 'client::TClientModel'. Two blue arrows originate from this box: one points diagonally up and to the left to a box labeled 'QAbstractTableModel', and the other points diagonally up and to the right to a box containing the text 'std::vector< commonDefine Client::tdLogItemClient >'. The top-left box has a thin black border, while the top-right box has a thin grey border. The bottom box has a thick black border.
